

## BIG QUESTION

HAVE YOU EVER HAD SOMETHING IN COMMON WITH SOMEONE YOU DIDN'T KNOW/LIKE?

Just like the page in the book, children think of different uses for spider webs, and make adverts for them to try and sell

### HOOK LESSON

Make a web assault course for children using ropes. Children have to navigate it without touching the web, otherwise they get stuck

It would be a fantastic science investigation to research why and how spiders make webs, as part of a topic on animals/insects

Children create their own artistic posters for the Spider and the Fly band

POSTER.

### SPEAKING & LISTENING

In groups, children create their own insect songs, around a theme. They could even use their bug instruments

It would be a fab DT lesson to make mini instruments that make music. This could link to a Science lesson on Sound
